Project Title: Spaghetti Westerns Website

I plan to design this site as a multi-page website with a clean structure that can be explored through links on the navbar. It would also include a lot of movie stills, audio, and embedded videos. This is all to best convey the unique history and cultural impact of Spaghetti Westerns.

Pages:

- **Introduction** — Setting the context for Spaghetti Westerns and establishing the cultural and cinematic significance of these films.
- **Origins** — historical background
- **Iconic Filmmakers** — the most influential directors and their contributions
- **Legendary Actors**
- **Artistic Choices** — a closer look at the genre's distinctive elements like musical score and visual styles.
- **Global Impact** — how Spaghetti Westerns transformed the Western genre
- **Sources**
